

Organizational Fact Sheet

About

ASQS (Advanced Safety and Quality Solutions) is a leading global provider of web-based, integrated aviation safety, quality and risk management software, headquartered in Vienna, Austria, with the subsidiaries ASQS Ltd. in Bangkok, Thailand and ASQS Safety and Quality Solutions Inc. in Calgary, Canada. With our core product iQSMS, we specialize in developing and delivering an intuitive, user-friendly software solution that supports aviation organizations of all types and sizes in their daily operations.

Mission

Our mission is to provide aviation professionals with intuitive software to facilitate their daily safety, compliance and risk management responsibilities. Whether on the ground or in the air, we are your partner to take your operational safety to the next level.
